

MEDICAL DEVICE TEST SYSTEM ADVANTAGES OF TM TEST SYSTEM

- Small footprint modular design based on test modules tailored specifically for the Medical Devices Test Applications
- Low cost dedicated medical test building blocktailors to a variety of test system configurations for the Medical Devices.
- Substantial cost per test reduction.
- Minimal underutilized resources.
- “Floating system ground” substantially reduces Noise floor and improves accuracy of the measurements.
- High reliability and simplified maintenance due to minimized instrument interconnections.

Over 60% cost reduction
Higher performance

CONFIGURATION EXAMPLE: PULSE GENERATOR
